# INAUGURATION

# ORGANISERS

FICCI - The largest & oldest apex organization of Indian business & industry is the rallying point for free enterprises in India. It has empowered Indian Businesses in changing times to shore up their competitiveness & enhance their global reach. With a nationwide membership of over 1500 corporate and over 500 chambers of commerce and business associations, FICCI espouses the shared vision of Indian businesses and speaks directly and indirectly for over 2,50,000 business units. FICCI maintains the lead as the proactive business solution provider through research, interactions at the highest political level and global networking.

FICCI organizes a large number of events including Exhibitions, Conferences, Seminars, Business meets etc. for promoting business. The major trade fairs organised by FICCI include India Chem, India Aviation Show, India Exhibition: Lahore, Stonemart, Annapoorna - World of Food India, Arogya etc.

FederUnacoma (Italian Agricultural Machinery Manufacturers Federation) represents since 1945 a very wide sector of mechanical engineering industries. The Federation brings together associations of manufacturers of machinery, equipment and technologies for agriculture, gardening, groundskeeping, earthmoving and components. The industries represented by FederUnacoma play an extremely prominent role on the international scene in holding absolute front rank status for production capacity, with some ten billion euros in sales annually, for the extent of their ranges, efficient response to the most widely diverse needs of agriculture and allied sectors and their export capabilities in exporting 65% of their production to markets in more than 170 countries. FederUnacoma is the instrument through which these Italian agricultural mechanization industries conduct their dialogue with institutions, promote innovations, an enterprise culture and their presence on the domestic and international markets. FederUnacoma organizes agro-mechanical exhibitions like EIMA International (Bologna, I), EIMA Agrimach (New Delhi, India) and Agrilevante (Bari, I).

# CO-ORGANISERS

Ministry of Agriculture  
& Farmers Welfare  
Government of India

For the 8th year in a row, Ministry of Agriculture & Farmers Welfare, Govt. of India was the co-organiser of the event & played a pivotal role in guaranteeing the success of the initiative, especially in regard with the farmers' community, which represents the backbone of India's society.

## EIMA AGRIMACH

During the 8th edition of EIMA AgriMach 2024, FICCI spearheaded and organized a series of sessions aimed at fostering dialogue and collaboration within the agricultural machinery sector. The inaugural day saw the convening of dynamic CEOs Forum, setting the stage for a series of four conference sessions held during the course of the international exhibition. These gatherings provided a platform for esteemed industry leaders, policymakers, experts from the global farm machinery community, academia, agriculture startups, and farmers to come together to engage in insightful discussions and share valuable perspectives.

## CONFERENCE SESSIONS

### Key highlights from the conference sessions:

- Embracing sustainable innovations in agricultural mechanization is imperative, not only for mitigating adverse environmental effects but also for enhancing crop yields and streamlining labor-intensive processes.
- As farming becomes increasingly reliant on complex technology, it is crucial to make training & skilling programs available and accessible to all farmers, to ensure inclusivity across all farming communities.
- The rise of startups in agriculture and farm machinery is reshaping traditional farming methods through the utilization of artificial intelligence and robotics. Technologies such as drones, self-driving tractors, robotic harvesters, and automated irrigation systems represent the inevitable future of agriculture. Prioritizing the adaptation of these innovations for smallholder farmers is crucial for their relevance and accessibility.

# CONFERENCE

- Proactive policy changes at the governmental level serve as catalysts for industry innovation and startup growth. These changes not only spur the development of locally suitable machinery but also promote the adoption of modern technologies, ultimately enhancing agricultural productivity and improving farm-based livelihoods.
